Projects

Simple Static Website: By using HTML CSS and JavaScript. I build the simple website. https://github.com/Santoosh9/Simplestaticwebside

Library management system: By using java programming language, I developed library management system. It is difficult project for me but lot of practice I developed library management system which helps to maintaining book in a library and it helps to searching books in library. https://github.com/Santoosh9/libarymanagement

Responsive website: By using ReactJS I build the responsible in this project there are many pages pages which perform different tasks. The website about our store. https://github.com/Santoosh9/reactwebside

Online food ordering system (Restromeal): Online food ordering system An online food ordering system is a web-based application that will helps to ordering food internet by locating their favorite restaurant or nearest one. It is a full stack application which is my final year project (FYP). In front end I use react JS backend I use NodeJS and for database I use MongoDB. https://github.com/Santoosh9/onlineFoodOrdering-RestroMeal-

Recipe Finder App: By using React JS and SASS I build this web application. In application there are three main page and some other page. I used react usestate hook for fetching data from custom API and css annimation. User can search food ítems from serchbox. You can visit this link for more details https://master--recipe-finder-apps.netlify.app/

Online Shoes Store: This is my ongoing project. I use React JS and Tailwind CSS for this web application. This is fully responsive website. I use some CSS annimation on this project. You can visit this link for more details https://master--rainbow-gingersnap-69956a.netlify.app/

Portfolio Website: This is my portfolio website using react JS. You can visit this link for more details https://santoshgajurel.netlify.app/
